## Summary

I am a junior software engineer with a broad range of skills and expertise. I am proficient in Java, and have experience with C++, C#, Python, Android and back-end development. Additionally, I have a strong command of Bash scripting, Linux, ethical hacking, and Unreal Engine for game development. My knowledge also extends to SQL, database design, data structures and algorithms and a deep understanding of blockchain principles and development. Furthermore, thrive in collaborative environments and enjoy working with cross-functional teams to deliver high-quality software applications.

I believe that effective communication and teamwork are crucial in delivering successful software projects. I enjoy collaborating with colleagues, sharing knowledge, and being mentored by senior developers to foster a supportive and productive work environment.

## Experience

### Student Intern

WeThinkCode

Sep 2022 - Present (1 year 6 months)

I was primarily exposed to the Python programming language, solved problems functionally using Test-Driven-Development.

In my second semester I used Java to solve similar problems but this time using the O.O.P paradigm. Thrived in a simulated work environment wherein Bash, Linux admin, Apache maven, Git and Docker were fundamental technologies.

## Education

### WeThinkCode

systems development, I.T

Sep 2022 - Dec 2023

### University of Johannesburg

University of Johannesburg , Computer Science

2016 - Nov 2019

## Skills

Spring Boot • Node.js • JavaScript • Hibernate • Git • Cascading Style Sheets (CSS) • Git BASH  
• Test-Driven Development • Docker Products • Android Development
